

Rami Sharif

Cybersecurity Engineer

ramishraief@gmail.com | +963 932 459 338 | [LinkedIn: Rami Sharif](#)

[Website: rami-sharif.site](#) | Aleppo, Syria

Summary

Security Engineer with **2+ years** of experience securing on-prem, cloud, and hybrid infrastructures. Specialized in **secure network design, system hardening, and SOC operations**, dealt with organizations across Saudi Arabia, the UK, and Germany. Familiar with aligning security controls to **ISO/IEC 27001, NIST frameworks, and Saudi NCA Essential Cybersecurity Controls (ECC)**.

Experience

Cyberpedia | Security Engineer

Remote / April 2023 - Present

- **Built and managed a Security Operations Center Powered by Ai (SOC)** to deliver SOC as a Service for multiple clients across different sectors.
- **Designed and implemented secure network architectures** using pfSense, OpenVPN, and HAProxy, enabling secure remote access and granular access control.
- **Led hardening efforts** for internal systems and client infrastructures, including servers (Linux/Windows), networks, and web applications.
- **Secured cloud environments on AWS**, applying security best practices for IAM, VPC.
- **Performed WordPress security hardening** for client websites, mitigating common web vulnerabilities and improving overall security posture.
- **Supported incident detection and response activities**, analyzing security alerts and assisting in containment and remediation efforts.
- **Embedded DevSecOps across the SDLC**: secure code reviews plus SAST, SCA, secrets detection, IaC and container image scanning in CI/CD. Hardened Docker images (distroless/minimal bases, non-root users, dropped capabilities) and delivered secure-design and remediation guidance.

Government Sector (Confidential / NDA) | Network & Security Engineer

Remote / Nov 2025 – Present

- **Designed secure IoT** communication architecture with segmented network (DMZ + internal zones) using pfSense
- **Implemented mTLS authentication** using internal PKI (Step-CA) with per-device identity and automated certificate provisioning
- **Secured MQTT broker (EMQX)** with client certificate enforcement and topic-level ACLs
- **Secure Network Design** with OpenVPN, firewall policy enforcement, network segmentation, and controlled traffic flow.
- **Performed vibe penetration testing** on the organization's ERP system, identifying multiple High-severity vulnerabilities and delivering professional reports with PoCs, root-cause analysis, and remediation guidance

Certifications & Professional Training

- [Google Cybersecurity Certificate](#)
- [Security engineer \(TryHackMe\)](#)
- [Web security Fundamentals](#)
- eEDA (in progress)
- **CompTIA Network+ (Self-Study)**
- **CompTIA Security+ (Self-Study)**

Skills & Tools

- **Security Operations & SIEM**
Wazuh (SIEM & XDR), Incident Response Lifecycle, Log Analysis
- **Network Security**
pfSense , MikroTik ,OpenVPN, Wireguard ,HAProxy, Network Segmentation, Firewalling, Cloudflare WAF
- **Cloud Security**
AWS, Google Cloud (IAM, S3, CloudTrail, VPC, DLP, IaC Scanning, Logging)
- **DevSecOps & Application Security**
OWASP Top 10, SAST/SCA, secrets detection, IaC scanning, Docker hardening, secure code review, CI/CD security (GitHub Actions, GitLab CI), SAST (SonarQube)
- **Vibe Penetration Testing**
Proven results in finding High-severity vulnerabilities and reporting them professionally with working PoCs. Backed by strong OWASP Top 10 knowledge and a clear understanding of how vulnerabilities arise and how to fix them.
- **Scripting & Automation**
Python, Bash, n8n
- **IoT & PKI (Advanced)**
MQTT, EMQX, mTLS, Step-CA, PKI

Education

Bachelor's Degree in Telecommunication Engineering

University of Aleppo, Syria

Languages

- **Arabic:** Native
- **English:** Advanced (C1 level)
